The forecast for the fiscal year ending February 2022 (March 1, 2021 - February 28, 2022) is shown above. As it has been gradually normalized from COVID-19 related crisis, capital investment in the manufacturing industry as a whole has recovered strongly. In China, active investments are continuing in wide-ranged markets, including automobiles, new infrastructure-related and 3C products. Demand particularly from automobiles, semiconductors, and electronic components also remains high in other regions. As a result, the motion control business and the robotics business, which are our core businesses, have been receiving more orders than we expected, hence we have made an upward revision of our annual forecasts for the fiscal year ending February 28, 2022, which we announced on April 9, 2021.

For the above reason, considering overall business conditions of Yaskawa Group, we have revised our interim and year-end dividend forecast for the fiscal year ending February 2022 from ¥20 to ¥26. As a result, an annual dividend is planned to increase by 28 yen to 52 yen per share.

The average exchange rates for USD, EUR, and KRW were revised from the initial forecast. For the period from June 1, 2021 to February 28, 2022, 1 USD=109.0 JPY (initial forecast 110.0 JPY), 1 EUR= 131.0 JPY (130.0 JPY), 1 KRW= 0.097 JPY (0.096 JPY). 1 CNY is 16.80 JPY as originally planned at the announcement in April.

#### 4. Qualitative Information on Quarterly Results

##### Business Performance

In the first quarter under review, capital investment in the manufacturing industry as a whole recovered significantly as it was gradually normalized from COVID-19 related crisis. Active capital investments in new infrastructure-related projects continued to be implemented in China and demand in other regions also remained at a high level, especially in automobiles, semiconductors, and electronic components markets.

In this environment, Yaskawa Group captured strong demand on a global basis mainly in AC servo & controller business and the robotics business. As a result, revenue significantly increased on a year-to-year basis. Also, operating profit increased significantly on a year-to-year basis due to improved capacity utilization associated with a revenue increase and strict cost reduction through a variety of activities including the achievement through promoting YASKAWA Digital Transformation (YDX).

##### <Management environment of each region>

###### Japan:

Demand of market was firm because capital investments recovered in semiconductor, electronic component, and automobile market.

###### U.S.:

The economy moved into expansion phase because of continued robust capital investment in the semiconductor market as well as increased demand in the automobile and machine tool markets.

###### Europe:

Demand for automobiles and machine tools grew thanks to the market recovery along with the economy normalization.

###### China:

Capital investment was actively implemented in wide-ranged markets including automobiles, 5G, and new energy-related markets, supported by strong demand in Japan and overseas.

###### Other Asian Countries:

Capital investment in semiconductors and LCDs increased specifically in South Korea and Taiwan.
