Results Briefing for FY2023 (Ended February 29, 2024)

Notes:

- From FY2024, we revise the segment classification of power conditioners for solar power generation, which had been included in the System Engineering segment, to be included in the Motion Control segment. As a result, the figures of the full-year consolidated financial forecast for FY2024 are shown based on the revised information. Figures for FY2023 are presented based on the revised information only when they are compared to the full-year consolidated financial forecasts for FY2024. (See page 21.)

[Core products]

- AC servo motors and controllers
- Linear servo motors
- AC drives
- PV inverters
- PM motor

AC servo motor Σ-X series

YRM Controller "YRM1010"

Yaskawa AC drive GA 700 series

PV inverter Enewell-SOL P3A 25kW

Robotics

[Core products]

- Industrial robots
- Arc and spot-welding robots, painting robots
- FPD glass sheet transfer robots, handling robots
- Semiconductor wafer transfer robots
- Biomedical robots
- Collaborative robots

Collaborative robot MOTOMAN-HC30PL

7-axis arc-welding robot MOTOMAN-AR1440E

1. FY2023 Financial Results

FY2023 Financial Results (Highlights)

- Revenue increased as production normalized, and order backlogs were steadily filled.
- While price pass-through and progress in System Engineering business structure reform contributed positively, profit decreased by the effect of the elimination of other earnings occurred in the previous fiscal year.

	FY2023	FY2022	Chang	es

Profit attributable to owners of parent	¥ 50.7bn.	¥ 51.8bn.	-¥ 1.1bn.	-2.1%

FY2023 Financial Results by Business Segment

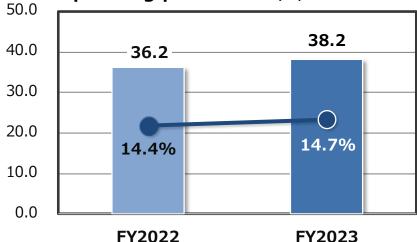

- In Motion Control, revenue and operating profit increased due to the normalization of production and price pass-through.
- In Robotics, although revenue increased due to the firm demand to upgrade and automate production and sales of large-scale projects related to EVs, operating profit decreased due to an increase in overhead costs.
- In System Engineering, operating profit significantly increased because of the progress in business structure reforms, such as the sale of shares of a subsidiary related to large-scale wind turbine.

Business Segment Overview: Motion Control

Operating profit (Billions of yen) Operating profit ratio (%)

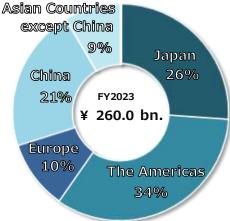

[Revenue]

- In AC servo & controller business, revenue decreased due to weak demand for semiconductors and electronic components and prolonged inventory adjustments.
- In Drives business, revenue increased globally due to the normalization of production.
- Oil and gas-related demand in the U.S. and infrastructurerelated demand in ASEAN countries and India were steady, which led to a significant increase in revenue.

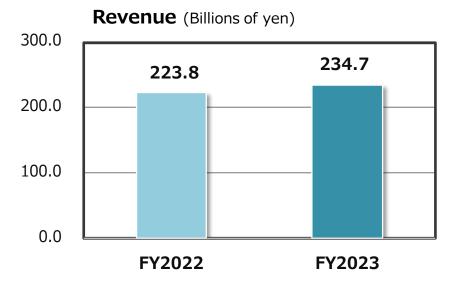

[Operating Profit]

 Profit increased due to improved profitability by price pass-through and the effect of switching to new products.

Business Segment Overview: Robotics

Operating profit (Billions of yen)
Operating profit ratio (%)

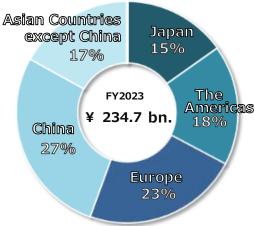

[Revenue]

- In general industries, while investment in China remained sluggish, investments in Europe and the U.S. remained firm to upgrade and automate production against the backdrop of rising labor costs and labor shortages.
- Sales of painting-related projects in the automotive market, mainly EVs, in Korea also contributed to the increase in revenue.

[Operating Profit]

 Profit decreased due to an increase in overhead costs, despite a positive contribution from efforts to price passthrough.

Revenue breakdown by region

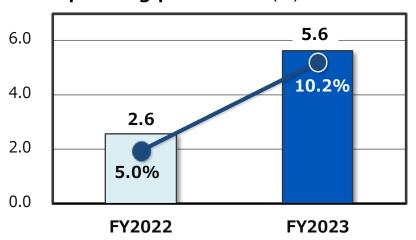

Business Segment Overview: System Engineering

Revenue (Billions of yen)

Operating profit (Billions of yen) Operating profit ratio (%)

[Revenue]

 Revenue increased due to solid sales of power conditioners for solar power generation and port cranes overseas.

[Operating Profit]

 Profit significantly increased because of the profit increase due to revenue increase, in addition to the progress in business structure reforms, such as the sale of shares of a subsidiary related to large-scale wind turbine.

Measures for FY2023 to Realize Mid-term Business Plan "Realize 25"

Creating Value through i³-Mechatronics Solutions

→ Development capabilities

- ➤ Launched the new autonomous robots, "MOTOMAN NEXT series" to pioneer unautomated areas
- Started to roll out "iCube Control," the controller solution to realize i³-Mechatronics
- Moved "automation of cucumber leaf removing work," which is being developed in collaboration with JA ZEN-NOH* to the full-fledged introduction phase

- Completed construction of a machining factory for robots in Japan to realize the expansion of in-house manufacturing
- > Determined construction of a new plant for robot systems in Ohio, the U.S.

→ Sales capabilities

- Promoted automation of plant factories through a capital alliance with Oishii Farm Corporation in the U.S. (May 2023)
- Proposed automation by autonomous decentralized control for the realization of i³-Mechatronics solution concept at International Robot Exhibition 2023 (December 2023)

Contributing to Realizing a Sustainable Society through Business Expansion of Mechatronics Applications

"Enewell-SOL P3A 25kW" power conditioner received two awards, "Japan Brand Award of Ten Greatest New Products Award," and "Energy Commissioner's Award of Energy Conservation Grand Prize"

Breakdown of Changes in Operating Profit (FY2023 → FY2024 Forecasts)

Measures for FY2024

Creating Value through i³-Mechatronics Solutions

→ Development capabilities

- Expansion of application cases and lineup of "MOTOMAN NEXT series"
- Development and demonstration of applications by strengthening lineup of "iCube Control" controller solutions

→ Production capabilities

- > Start construction of 5th robot factory
 - Build a production system that can flexibly respond to demand fluctuations through automation and labor-saving
- > Production enhancement of the U.S. business
 - Plan to make 30 billion-yen scale of capital investments over several years, including construction of a new plant for robot systems

Yahata-nishi Plant (robot village) overhead view

→ Sales capabilities

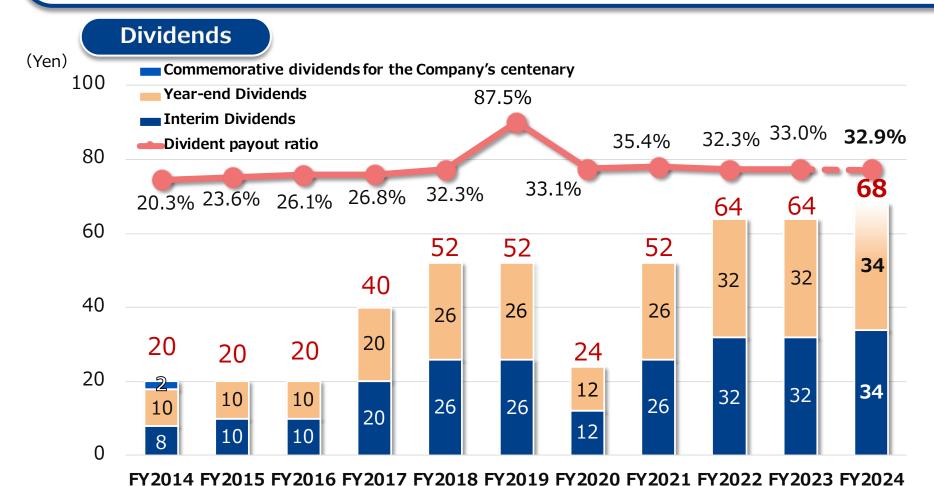

- Strengthen global sales structure focused on growing markets, such as the advancement of EV adoption
- Response to new technologies (3D packages, etc.) in anticipation of investment resumption in the semiconductor market

Contributing to Realizing a Sustainable Society through Business Expansion of Mechatronics Applications

Promotion of automation and construction of new industrial structures in the field of mechatronics applications such as food, biomedical, and agriculture

Shareholder Return (Dividends)

- In FY2023, an annual dividend was 64 yen per share.
- An annual dividend forecast for FY2024 will be 68 yen per share, an increase by 4 yen from the previous fiscal year. (A dividend payout ratio is 32.9%)
